

FLUSH BOOSTER FOR BLEEDERS

Contents: Five U.S. Gallons (18.9 Litres)

FLUSH BOOSTER FOR BLEEDERS

• **Directions for The Rug Sucker(no Marinator):** Always test for color stability before applying to any textile(s). If color(s) are stable, use regular FlushBOOSTer (read ALL label instructions before proceeding).

- For mild color instability, mix 3 oz. (43:1) **FB4B**
For moderate color instability, mix 5-6 oz. (25-21:1) **FB4B**
For severe/croaking color instability, mix 8-9 oz. (16-14:1) **FB4B**
For ALL dilution situations, use warm water and apply evenly to BOTH sides of a dry rug.

Allow a minimum of ten minutes of dwell time (the rug should be more than damp to the touch). Wet out the rug completely with cold, fresh water. Agitate BOTH sides of the rug. Perform the 'Rug Sucker rinse and extraction' steps (see below).

• **Directions for The Marinator+Rug Sucker** (best results)
Always test for color stability before applying to any textile(s). If color(s) are stable, use regular FlushBOOSTer (read ALL label instructions before proceeding).

- For mild color instability, mix 3 oz. (43:1) **FB4B**
For moderate color instability, mix 5-6 oz. (25-21:1) **FB4B**
For severe/croaking color instability, mix 8-9 oz. (16-14:1) **FB4B**
For ALL dilution situations, use warm water and apply evenly to BOTH sides of a dry rug.

Allow a minimum of ten minutes of dwell time (the rug should be more than damp to the touch) so that FlushBOOSTer For Bleeders can penetrate all the fibers (allow more dwell time for more soiled/unstable conditions). Fill The Marinator pond to capacity and connect The Rug Sucker Multi-tool to The Marinator pump (prime the Marinator pump). Lay the rug in The Marinator pond and prepare to 'pucker' the rug by starting the first roll underwater. Plug in The Marinator pump (the

discharge hose should be outside the pond). Slowly roll the rug around The Rug Sucker and add cold, fresh water to the pond as the contaminated water is flushed through the rug. Monitor the clear sight tube/elbow for an increase in clarity of the discharge water. Once the desired level of clarity is reached, place the discharge hose inside the Marinator pond and allow to circulate for a minimum of ten minutes. Once this 'marination' is complete, unplug the Marinator pump and release the side supports to drain the pond. Unroll the rug and agitate BOTH sides. Perform the 'Rug Sucker rinse and extraction' steps (see below).

• **Rug Sucker Rinse and Extraction Steps:** Completely wet out the rug again and prepare it for final rinse and extraction. Once the rug is 'puckered' up to The Rug Sucker Multi-tool, continue to add water as you roll the rug up to the final roll. Once the rug is resting on the final roll, continue to add cold, fresh water to the now rolled up rug. Monitor the clear sight tube/elbow for an increase in clarity of the rinse water. Continue this flushing action until desired results are reached, repeat if necessary. Allow the rug to be fully extracted, groom the pile and speed dry. Inspect for quality once the rug is completely dry.

• **Migration Correction Steps:** If color migration occurs during any of these steps, treat locally as needed with your premixed solution until the migration is flushed away (increase the solution temperature if necessary).

CONTAINS

Water (CAS # 7732-18-5), proprietary blend of polymer and non-ionic surfactants.

IMPORTANT NOTICE TO PURCHASER: Seller's and manufacturer's liability for any and all losses or damages resulting from any cause whatsoever shall in no event exceed the purchase price of this product, with respect to which losses or damages are claimed. Before using, the user shall determine the suitability of this product for its intended use, and user assumes all risk and liability whatsoever in connection therewith.

WARNING!

Keep out of reach of children.

HAZARD STATEMENTS:

Causes serious eye irritation.

PRECAUTIONARY STATEMENTS:

Wash face, hands and any exposed skin thoroughly after handling. Wear eye protection/ face protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

ATENCIÓN!

Mantener fuera del alcance de los niños.

INDICACIONES DE PELIGRO:

Provoca irritación ocular grave.

CONSEJOS DE PRUDENCIA:

Lavarse la cara, las manos y la piel concienzudamente tras la manipulación. Utilizar protección para la cara y los ojos. EN CASO DE CONTACTO CON LOS OJOS: Aclarar cuidadosamente con agua durante varios minutos. Quitar las lentes de contacto, si lleva y resulta fácil. Seguir aclarando. Si la irritación ocular persiste: consultar a un médico.

AVERTISSEMENT!

Tenir hors de portée des enfants.

MENTIONS DE DANGER:

Provoque une sévère irritation des yeux.

CONSEILS DE PRUDENCE

Se laver le visage, les mains et toute surface de peau exposée soigneusement après manipulation. Porter un équipement de protection des yeux / du visage. EN CAS DE CONTACT AVEC LES YEUX: rincer avec précaution à l'eau pendant plusieurs minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Si l'irritation oculaire persiste: Consulter un médecin.
